

MidPanel Nut™

A self-retaining nut solution providing high strength performance and allowing for flush and tight joints

High Strength

Achieves performance through the multi-threaded barrel extrusion and excellent retention via expanding legs.

Direct Push Installation

Installs with a single push. Automation compatible.

Enables Lightweighting

Achieves ~50% weight reduction over a cold formed nut while offering same strength properties.

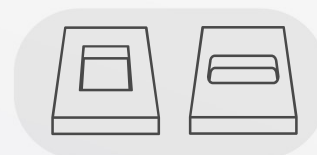

Enables Close Panels

Allows for tight panel fit and flush joints when used in plastic and metal panels with a recessed hole.

Visible Pre-Assembly

Installs and retains in panel prior to final assembly.

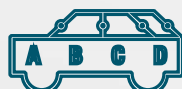

Installs into Recessed Square or Rectangular Hole

Ideal Applications:

Instrument Panel

Pillars

Center Console
