

# PyraMid Nut™

An ergonomic, space-optimized midpanel nut that addresses a wider panel range and allows for a shorter screw

## High Strength

Achieves performance through the multi-threaded barrel extrusion and excellent retention via expanding legs.

## Ergonomic Installation

Installs with a single push at 45N (10 LBF) MAX. Automation compatible.

## Fastener Standardization

Achieves high retention in 3x wider panel range compared to standard midpanel nuts.

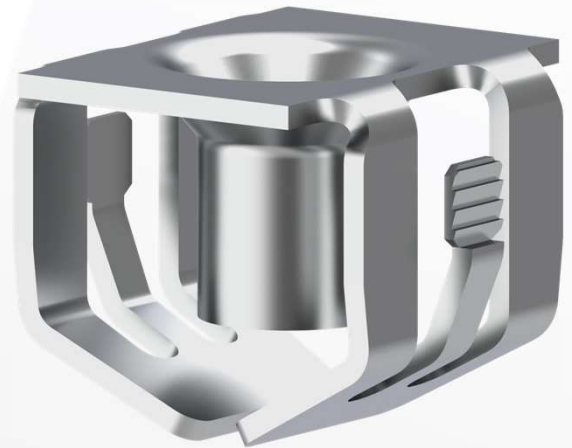

## Cost Savings

Reduces cost in the fastened joint through utilization of shorter screws and bolts.

## Flush Install

Holds flush in all orientations to mitigate assembly interference and aid bolt alignment.

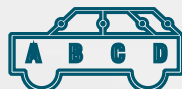

**Installs into  
Rectangular Hole**

## Ideal Applications:

Instrument Panel

Pillars

Center Console
